

DigiMemo Bluetooth Transmitter for BlackBerry/Android/Smartphone to Send Email/MMS Written on Paper

Upgrade your DigiMemo L2 / A402 for Smartphone!

With the *Bluetooth* Transmitter, your DigiMemo can send your Email/MMS written on paper or sticky note by Smartphone (BlackBerry/Android/Symbian/Windows Mobile).

You can store or send your handwriting/drawing on paper/sticky notes as image (JPG), PDF or DHW in the Smartphone, including note, memo, message, formula, schematic, illustration, diagram, draft, idea or design. Easily zoom in/out and move a zoomed page to view on your phone screen.

- Simply plug the *Bluetooth* Transmitter into the DigiMemo and use its DigiMemo Express software to easily select, transfer and view your handwritten notes on the Smartphone.
- The Auto Capture function automatically captures only your handwriting area as an image.
- The Frame Capture function allows you to easily select the handwritten area as an image by moving a fixed frame.
- Portable and compact at only 0.017 lbs (7.6 g).
- The *Bluetooth* Transmitter used with the DigiMemo is also an excellent solution for paper form applications where the handwritten ink data can be immediately sent to the office by Smartphone.
- Works with Smartphone OS: BlackBerry 4.6 or higher, Android 2.1 or higher, Symbian S60 3rd/5th Edition, Symbian UIQ 3.x or Windows Mobile 5/6.
- Its DigiMemo Express software for BlackBerry / Android can be free installed from BlackBerry App World / Android Market on your Smartphone.
